January 7, 1966

SOYBEANS SHARPLY HIGHER - OTHER GRAINS STRONGER

Cash grain markets were featured by sharp price increases in soybeans during the week ending January 6. Most other grains were stronger in a week of active trading.

Winter wheat closed mostly 1-3¢ per bushel higher as exporters bid aggressively for the available supplies. Domestic demand held up well. The condition of the 1966 crop was generally good over most of the producing area. Spring wheat eased off 1-2¢ per bushel as receipts were rather large for the limited demand. New flour business was not pushing. Durum was about unchanged with few sales made. Soft white wheat held steady at Portland behind a fair export demand. Hard winter dropped about a nickel on the West Coast as export demand was lacking. Rye advanced 5¢ per bushel despite about 50 percent increase in stocks over last year.

Corn prices turned upward 2-5¢ per bushel as growers continued to sell only limited amounts of stored corn. Exporters expressed concern over the decrease in terminal stocks. Inspections for exports remained well above a year ago. Oats were about steady to 2¢ per bushel higher reflecting a good demand from feed mixers for the limited supplies. Barley held firm in a fairly active market with primary interest in the better grades. Grain sorghum ranged from a penny higher to a penny lower with a good demand for heavy offerings.

Soybeans turned sharply higher and closed 10-11¢ above a week ago. Strong export demand, reduced oil stocks, and large inspections for export were strengthening factors. Flaxseed remained unchanged in Minneapolis.

Special Features

	<u>Page</u>
Average farm prices, parity and support rates	2
Grains - export prices at specified points	2
Wheat - supply and distribution, monthly	6
Food for Peace Authorizations and Agreements	6
Grains - CCC dispositions	7

Average prices received by farmers, effective parity, and support rates
(Dollars per bushel except grain sorghum per cwt.)

1/ Payment-in-kind rates for 1965-crop are included as follows: corn 20¢, barley 16¢ per bushel, grain sorghum 35¢ per cwt.; 1964-crop corn 15¢, barley 12¢ per bushel, grain sorghum 23¢ per cwt.; 1963-crop wheat and corn 18¢, barley 14¢ per bushel, grain sorghum 29¢ per cwt.

2/ Does not include 75¢ (1964-crop 70¢) per bushel domestic marketing certificate and 30¢ (1964-crop 25¢) per bushel for export marketing certificate.

Grains: Export prices basis prompt or 30-day shipment, January 6, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
--Dollars--					
Duluth.....	No. 1 Heavy Northern Spring, 14% protein....	1.87	-	-	-
Baltimore.....	No. 2 Soft Red Winter..	1.86	1.45	2.86	1.46
Gulf.....	No. 1 Hard Winter: Ordinary protein.....	1.81	1.43	2.88	2.16
	14% protein.....	1.86	-	-	-
Pacific Northwest...	No. 2 Western White....	1.61	-	-	1.33

1/ The export payment rate for wheat on January 6, was 49¢ per bushel for spring wheat from Duluth, 54¢ for soft red winter from Baltimore, 54¢ for hard winter from the Gulf, and 29¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

1/ July 1-December 31, 1965 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1-December 31, 1965 for corn; and September 3-December 31, 1965 for soybeans.

The Agricultural Stabilization and Conservation Service reported value, as of November 30, 1965, of feed grain certificates issued for crop-years 1963, 1964, and 1965 was \$3,374,078,725. Sales against the certificate pools, by crop year, were: 1963 \$119,263,666; 1964 \$345,536,061; and to date in 1965 \$8,919,579. These sales left a combined feed grain certificate value of \$2,900,359,419 as of December 31, 1965.

January 14, 1966

SOYBEANS AND RYE SHARPLY HIGHER

Cash grain markets generally strengthened during the week ended January 13. Good export demand and active domestic buying boosted most grain prices to season's high level. Rye and soybeans led the advance with corn and spring wheat making more moderate gains.

Hard winter wheat closed about unchanged despite increased farm and country selling. Export demand remained good but domestic mill interest was only fair. Soft red winter wheat gained 1-3¢ with offerings limited. Spring wheat advanced 2-3¢ per bushel due in part to active mill buying and good export demand. Top quality durum held steady while intermediate milling grades were up 10¢ per bushel. Hard winter gained 2¢ and soft white 1¢ per bushel in the Pacific Northwest with good export sales and slackening country offerings. Rye advanced 8¢ per bushel with some export inquiry and reports of smaller acreages in some producing countries for the 1966 crop.

Corn prices went up 1-3¢ per bushel reflecting the good export demand and moderate country selling. Corn exports, October-December, were 45 million ahead of last year while CCC sales in the same period were 28 million less. Oats gained 1-2¢ with good demand for light receipts. Barley was unchanged to 2¢ higher with buying moderate. Grain sorghum held steady with a fair interest in limited offerings.

Soybean prices advanced 10-11¢ per bushel during the week reflecting continued export interest in both beans and the products. Producers continue to hold soybeans as indicated by January 1 farm stocks which were 48 percent more than a year earlier with only a 20 percent increase in the crop. Flaxseed gained 3¢ with a somewhat stronger tone.

U.S. Grains - inspections for export from Canadian ports compared with Total shipments, 1961-1965	20

GRAIN INSPECTED FOR EXPORT ... during calendar year 1965 totaled a record 1.7 billion bushels. This was nearly 8 percent greater than the previous record of 1.6 billion bushels inspected for export during 1964. It exceeded the 5-year (1959-63) average of 1.2 billion bushels by about 44 percent. Sharp gains in export inspections of corn and grain sorghum and slight gains for soybeans and oats more than offset drops in wheat and barley inspections for export.

Nearly 600 million bushels of corn were shipped out during 1965 -- 122 million bushels more than 1964's previous record. Export inspections of 171 million bushels of grain sorghum ran 70 million bushels larger than the year before. Inspections of soybeans in 1965 reached almost 230 million bushels -- 20 million more than in 1964. Although wheat exports of 622 million bushels ran 95 million bushels below the 1964 record, they were the largest for any other year.

About 60 percent, or slightly over 1 billion bushels, of the grain inspected for export during 1965 moved out of Gulf ports. This was about the same percentage as in 1964. Pacific Coast grain shipments hit a record high -- 241 million bushels. They were well above 1964's 170-million-bushel total and slightly higher than 1957's 224-million-bushel previous record. Exports of 32 million bushels of grain sorghum from California ports plus large West Coast wheat shipments mainly accounted for the increase. Nearly 300 million bushels of grain were inspected for export from Lake Ports -- about 50 million more than the previous year. Heavy shipments of corn and soybeans were responsible for most of this increase. Direct overseas shipments from Lake Ports totaled over 155 million bushels in 1965 compared with 118 million in 1964 and 73 million in 1963.

Shipments of U. S. grain from Canadian ports during 1965 reached 111 million bushels -- 16 million bushels more than during the 1964 shipping season but 9 million less than the record in 1963. (See details on pages 18-20).

Grains: Export prices basis prompt or 30-day shipment, January 13, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} The export payment rate for wheat on January 13, was 50¢ per bushel for spring wheat from Duluth, 54¢ for soft red winter from Baltimore, 53¢ for hard winter from the Gulf, and 29¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Volume 14 No. 3

Hyattsville, Maryland 20782

January 21, 1966

CASH GRAIN MARKETS MIXED

Cash grain markets closed with a mixed trend for the week ending January 20. Corn, rye and winter wheat closed mostly lower while other grains were either unchanged to higher.

Winter wheat eased off about a penny. Movement from producers and country elevators slackened somewhat. Miller demand and export interest was about at the level of a week ago. Snow cover over much of the producing area eased concern about extensive winter damage. Spring wheat advanced 1¢ per bushel with demand good for high protein wheats. Durum wheat went up 5¢ per bushel as millers were attempting to obtain supplies to cover recent heavy semolina sales. Soft white wheat closed about unchanged in the Pacific Northwest with supplies about in balance with fair domestic and export demand. Rye reversed the sharp advance of a week ago and closed 6¢ per bushel lower. Flour sales were slow and export interest was not apparent.

Cash corn markets were generally weaker with losses ranging from 1-4¢ per bushel. Export business remained fair but domestic demand was lacking. Movements from country points was fairly heavy. Oats, influenced by weaker corn markets, closed unchanged to 1¢ per bushel lower. Demand from feed mixers held up well. Barley was about 2¢ per bushel higher at most points but advanced 5¢ in the Pacific Northwest. Exporters and malsters were active bidders for the light supplies. Grain sorghum closed unchanged to 2¢ per cwt. higher reflecting good domestic demand and active export inquiries.

Soybean prices leveled off after a series of sharp advances and closed 1-3¢ per bushel higher. Spot and to-arrive demand was active with exports at a good rate. Oil and meal prices remained high. Flaxseed buyers raised bids 6¢ per bushel reflecting an increased demand from crushers for restricted supplies.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Grains - inspections for export by ports and areas, calendar years 1961-1965.	6
Grains - CCC-owned stocks by States, December 31	7-9
Grains - owned by Commodity Credit Corporation, January 1, 1961-1966.....	10
Grain stocks on farms, January 1	10
Grains - quantity outstanding under price-support resale loans by States, December 31, 1965	11
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support, repaid and outstanding by States	12-19
Grains - quantity under price support	20

PRICE SUPPORT ACTIVITIES ... through December 31 show that farmers put 150.5 million bushels of 1965-crop wheat under price-support loans. This compares with 164.0 million a year earlier and 145.3 million two years ago. Farmers had repaid loans on 38.2 million bushels at the end of December as against 25.6 million through December 1964. Farmers put 102.7 million bushels of corn under loan by the end of December -- 4.2 million less than a year earlier. Through December farmers put 67.3 million bushels of soybeans under loan as against 18.5 million the year before. The quantity of grains remaining under price-support resale loan as of December 31, 1965, in million bushels, with December 31, 1964 in parentheses, were as follows: Wheat 68.9 (51.8); corn 356.1 (443.5); barley 7.0 (15.3); oats 38.2 (21.2); and grain sorghum, in million cwt., 19.3 (14.1).

CCC-OWNED GRAIN ... totaled 1,664 million bushels on January 1, 1966 compared with 2,193 million owned on January 1, 1965. This does not include grain under price support loan or resale loan. The quantity of grain owned by CCC has dropped from a record of 3,176 million on January 1, 1961 with the largest decrease in stocks of wheat and corn. CCC owned 530 million bushels of corn on January 1, 1966 as compared with 1,448 million the record January 1 high in 1961. Wheat owned by CCC totaled 572 million this January or about half the 1,109 million owned January 1, 1961. The quantity of grain sorghum owned by CCC amounted to 493 million bushels on January 1 while for the previous 5 years it totaled around 550 million bushels. While the quantity of barley owned by CCC has decreased steadily during the past six years the amount of oats has increased from a less than 7 million in 1962 to nearly 41 million in 1966. (Details page 10).

Grains: Export prices basis prompt or 30-day shipment, January 20, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
			--Dollars--		
Duluth.....	No. 1 Heavy Northern				
	Spring, 14% protein...	1.88	-	-	-
Baltimore.....	No. 2 Soft Red Winter...	1.86	1.47	3.00	1.46

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

CONSUMER AND MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 9 No. 1

Hyattsville, Maryland 20782

January 27, 1966

Grain prices advanced moderately during the October-January period reflecting in part the good export demand and generally favorable feeding ratios for feed grains. Grain prices in January were mostly above a year ago with the exception of grain sorghum, soybeans and flaxseed. Stocks of feed grains on January 1 were 4 percent above a year ago but less than the 5-year average. Wheat stocks were the smallest in 12 years while soybean stocks were 18 percent above the previous record two years earlier.

WHEAT ... prices generally advanced in the October-January period with the greatest increase for soft red winter. Prices of this class went up 12-15¢ per bushel due in part to the good export demand and relatively short supplies. Hard winter in the Midwest, and white wheat in the Pacific Northwest gained 4-5¢ per bushel. Spring wheat advanced only 1¢ for ordinary protein and 3-4¢ for the higher protein grades. Stocks of wheat in all positions, January 1, totaled 1,339 million bushels, 110 million less than a year earlier and the smallest since 1954. Of the total stocks 753 million were either owned by Commodity Credit Corporation or under loan. Farmers put 150 million bushels of 1965-crop wheat under price support through December 31 -- 14 million less than a year earlier. Exports of wheat and flour, July through December, totaled 393 million bushels, slightly above last year's record. Milling of wheat for flour at about 300 million bushels was a little more than a year earlier but below average. Wheat supplies in Canada for 1965-66 total 1,193 million bushels -- 133 million more than for 1964-65. Canadian exports of wheat and flour totaled a record 280 million bushels August through December this season as against 197 million the same months of 1964.

RYE ... prices thus far this season averaged 9¢ per bushel below the same months a year earlier due in part to the larger supplies and only moderate exports. However, prices in January at Minneapolis were 6¢ per bushel above a year ago. Rye stocks of 28.5 million bushels were 34 percent above last year. Exports of 1.5 million bushels were somewhat more than the previous year but sharply below the 5-year average. Consumption of rye for alcohol and for milling the first half of the season was about the same as last year and the average. CCC owned stocks of 5.7 million bushels were sharply above recent years.

CORN ... prices generally advanced during the October-January period despite the record crop. Record exports and favorable feeding ratios provided strength to the market. Prices at principal terminals the first three weeks of January averaged 12¢ per bushel above October and 3¢ above January 1965. Farm prices, October-December this season were 5¢ below the same months last season. Stocks of corn in all positions on January 1 totaled 4.1 billion bushels. This is 143 million more than last year but 326 million less than the 5-year January 1 average. Of the total stocks, CCC owned 530 million with an additional 458

million under loan or reseal. Exports of 188 million bushels of corn the first quarter were the largest of record. The wet milling industry also used a record 51 million bushels of corn. Around 995 million bushels of corn were fed the first quarter -- 40 million above last year and 85 million above average. The number of grain consuming animal units fed in 1965-66 is currently estimated at 168 million compared with 167.3 million in 1964-65 and 169.5 the 5-year average. On this basis 5.9 bushels of corn were fed per animal unit the first quarter this season as against 5.7 last season and 5.4 bushels the average.

OATS ... prices advanced during the October-January period reflecting in part the large exports. Market prices in January were around a penny below a year ago. Stocks of oats on January 1 totaled 783 million as against 710 million on January 1, 1965. Disappearance the first half of the season, mainly for feed totaled 460 million -- the smallest in recent years. Exports of nearly 22 million were the second largest in 25 years of record and compare with less than 3 million last year.

BARLEY.... prices at the farm, October-December, averaged nearly 6¢ per bushel above the same months in 1964. Market prices for choice malting barley at Minneapolis in January were 8¢ above a year ago while feed barley was 16¢ higher at Portland but only 2¢ higher at Los Angeles. Stocks in all positions on January 1 at 313 million were the second smallest since 1957 -- 2 million more than a year ago. Disappearance of 204 million the first half of the season was the smallest since 1954. Exports of 36 million were 4 million above last year but 4 million below average. While industrial usage, mainly for beer was at last year's high level, consumption for feed totaled only 115 million as against 150 million the year before.

GRAIN SORGHUM ... prices at the farm for October-December averaged 13¢ per cwt. below a year earlier reflecting the record production and continued large stocks. Market prices in January were 17-18¢ per cwt. below a year earlier. Stocks of 554 million cwt. on January 1 were 20 million above last year but slightly below average. Of the total stocks, CCC owned 276 million with an additional 61 million cwt. under loan or reseal. Exports of 27 million cwt. the first quarter was the largest of record, nearly double last year or the average. The quantity remaining for feed at 107 million cwt. was 18 million above a year earlier.

SOYBEAN ... prices at Illinois points for October through January averaged 17¢ per bushel below a year earlier reflecting the largest crop of record. Prices at these points in January were 11¢ below January 1965. Stocks of 619 million bushels on January 1 were 92 million more than a year ago. Crushings of 172 million, September through December, and exports of 104 million were both well above the record of a year ago. Through December 31 farmers had put 67 million bushels of 1965-crop soybeans under price support as against only 18 million a year earlier.

FLAXSEED ... averaged \$3.01 per bushel at Minneapolis the first part of January compared with \$3.11 in July and \$3.18 a year ago. Flaxseed stocks of 32 million are 9 million more than a year earlier. Exports of flaxseed, July-December, of 3.2 million were only half those of last season. Crushings of about 11 million were slightly below the same months of 1964. Farmers put 8.5 million bushels of flaxseed under price support by the end of December as against 6 million a year earlier.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks for 1964 and 1965 are preliminary. October-December 1965 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

Rye: Supply and distribution, 1959-65

Volume 14 No. 4 Hyattsville, Maryland 20782 January 28, 1966

SOYBEANS, CORN AND RYE DECLINE

Cash grain markets were featured by lower soybeans, corn, oats, and rye for the week ended January 27. Spring wheat and barley strengthened while other grains were about unchanged.

Hard winter wheat showed a mixed trend with mill demand good for limited offerings of high protein types. Producer selling remained draggy with supplies in tight hands. Export bids were unchanged to slightly higher. Soft red winter was down a penny in light trading. Spring wheat was 1-2¢ per bushel higher with demand good especially for sound milling qualities. Durum was steady with daily offerings well absorbed by export and mill demand. White wheat gained a penny in the Pacific Northwest with continued active export buying and light country selling. Rye declined 3¢ due to the large supplies and little export interest.

Corn prices generally declined 2-3¢ per bushel except at Omaha where the market was steady. Weakness reflected somewhat larger receipts since demand remained good. Oats were 1-2¢ lower due in part to the lower corn market. However, feed mixers were active buyers due to the cold weather. Barley advanced 1-2¢ reflecting smaller receipts and a steady demand. Grain sorghum prices were steady to 1¢ per cwt. higher at Ft. Worth and Los Angeles with export demand good. Kansas City posted bids of 3-4¢ above a week ago.

Soybean prices were mostly 5¢ per bushel lower due in part to the reported record January 1 stocks. Soybean oil prices held up well but meal prices closed lower. Both export and crushings remain at record levels. Flaxseed was unchanged at Minneapolis in light trading.

Special Features

	<u>Page</u>
Food for Peace Agreements	2
Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, December	6-7
Grains - inspected receipts at selected markets, December	8-9

Pacific Northwest...	No. 2 Western White....	1.64	-	-	1.39

1/ The export payment rate for wheat on January 27, was 50¢ per bushel for spring wheat from Duluth, 53¢ for soft red winter from Baltimore, 52¢ for hard winter from the Gulf, and 30¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

1/ Estimates of Crop Reporting Board.

2/ Owned by CCC and stored in bins or other storages owned or controlled by CCC; other CCC-owned grain is included in the estimates by positions.

3/ All off-farm storages not otherwise designated, including flour mills, terminal elevators, and processing plants.

4/ Totals included in All Wheat.

5/ 1962-64 average.

6/ September 1 estimate.

Crop Reporting Board.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Jan. 2/ 1966	Dec. 1965	Nov. 1965	Jan. 1965
Soybean Oil:					
Average price at crushing plant.....	Cents per lb.	11.8	11.2	11.1	11.6
Value from bushel of soybeans <u>1</u> /.....	Dollars	1.30	1.23	1.22	1.28
Soybean Meal 44%:					
Bulk price at Decatur.....	Dollars per ton	78.90	71.60	76.00	68.30
Value from bushel of soybeans <u>1</u> /.....	Dollars	1.89	1.72	1.82	1.64
Value of oil and meal from bushel of soybeans <u>1</u> /.....	Dollars	3.19	2.95	3.04	2.92
Market price of No. 1 yellow soybeans at Illinois Points.....	Dollars per bu.	2.77	2.62	2.49	2.87
Spread between soybean price and value of oil and meal.....	Cents	42	33	55	5

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop years 1964 and 1965.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

February 4, 1966

SOYBEAN PRICES HIGHER -- OTHER GRAINS MOSTLY UNCHANGED

Cash grain markets were firm to slightly stronger during the week ended February 3. Soybean, flaxseed and spring wheat prices advanced while other grains closed about unchanged from a week ago.

Winter wheat prices held at last week's level with demand fair for plentiful supplies. Carlot arrivals showed a moderate gain as country elevator selling increased. Mill buying for higher proteins continued strong but export buying was limited. Spring wheat demand improved and prices for higher proteins gained 2-3¢ per bushel. Other varieties were firm as bitter cold weather limited receipts. Durum demand was spurred by good export interest and light arrivals. White wheat held steady in the Pacific Northwest with continued good export buying and limited country selling. Rye closed a fraction higher as scanty export interest and large supplies continue to dampen buying.

Corn prices closed not more than a penny up or down as increased receipts were offset by a somewhat better demand. Processors bought heavily and export needs continued to provide a firm base. Oats were barely steady with a fair interest in light offerings. Barley held firm with demand good. Grain sorghum prices held steady to slightly higher with offerings about in line with moderate buying.

Soybean prices advanced 2-3¢ with a fairly good processor and export demand. Soybean oil prices advanced but meal closed lower. Export interest in oil added strength to soybeans. Flaxseed gained 5¢ during the week at Minneapolis.

1/ Payment-in-kind rates for 1965-crop are included as follows: corn 20¢, barley 16¢ per bushel, grain sorghum 35¢ per cwt.; 1964-crop corn 15¢, barley 12¢ per bushel, grain sorghum 23¢ per cwt.; 1963-crop wheat and corn 18¢, barley 14¢ per bushel, grain sorghum 29¢ per cwt.

2/ Does not include 75¢ (1964-crop 70¢) per bushel domestic marketing certificate and 30¢ (1964-crop 25¢) per bushel for export marketing certificate.

Grains: Export prices basis prompt or 30-day shipment, February 3, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley
	Grade	No. 2	No. 2	or Grain
	Price	Yellow	Yellow	Sorghum 2/
		-- Dollars --		
Duluth.....	No. 1 Heavy Northern			
	Spring, 14% protein...	1.91	-	-
Baltimore.....	No. 2 Soft Red Winter...	1.86	1.46	3.01
				1.46
Gulf.....	No. 1 Hard Winter:			
	Ordinary protein.....	1.82	1.45	3.00
	14% protein.....	1.88	-	2.16
			-	-
Pacific Northwest....	No. 2 Western White....	1.64	-	-
				1.39

1/ The export payment rate for wheat on February 3, was 52¢ per bushel for spring wheat from Duluth, 52¢ for soft red winter from Baltimore, 52¢ for hard winter from the Gulf, and 30¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

^{1/} July 1, 1965-January 28, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-January 28, 1966 for corn; and September 3, 1965-January 28, 1966 for soybeans.

^{2/} Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of December 31, 1965, of feed grain certificates issued for crop-years 1963, 1964, and 1965 was \$3,381,490,152. Sales against the certificate pools, by crop year, were: 1963 \$119,263,666; 1964 \$345,536,061; and to date in 1965 \$75,085,738. These sales left a combined feed grain certificate value of \$2,841,604,687 as of January 28, 1966.

Hyattsville, Maryland 20782

February 11, 1966

SOYBEANS HIGHER -- OTHER GRAINS MOSTLY UNCHANGED TO HIGHER

Cash grain markets were generally firm during the week ended February 10. Soybean, rye and corn prices advanced while other grains closed about unchanged from a week ago.

Winter wheat prices strengthened reflecting large purchase authorizations to India and other countries. Export prices advanced a penny for hard winter while domestic soft red winter prices went up 2¢ per bushel. Domestic mill interest for hard winter wheat was light while producer selling remained slow. Spring wheat markets were moderately active with the best demand for high protein wheat. The flour market was quiet but there were Government orders for export flour. Durum trading was active but prices held unchanged from a week ago. White wheat held firm in the Pacific Northwest as exporters competed vigorously for remaining supplies. Country selling was slow at the unchanged price level. Rye advanced 2¢ due to some increased buying and smaller receipts.

Corn prices generally gained a penny despite rather liberal offerings. Export interest continued to provide good support although feed business was a little easier due to unusually mild temperatures. Oats were unchanged to 1¢ higher with good demand for moderate receipts. Barley continued strong at Minneapolis, with bidding quite aggressive. Prices were 1-2¢ lower at Portland due to a lack of export interest. Grain sorghum prices were unchanged to 1¢ per cwt. lower with a fair demand for moderate receipts.

Soybeans advanced 5-7¢ per bushel as elevators and processors competed aggressively for the moderate offerings. Exports continue heavy with 130 million bushels inspected for export September through February 4 this season as against 81 million the same period last year. Flaxseed declined 4¢ at Minneapolis despite rather small receipts.

AGREEMENTS					
India.....	Feb. 7		Wheat	73,500	118,100
India.....	" 7		Grain sorghum	39,400	48,800

- 1/ Hard red spring, hard red winter, and mixed wheat.
- 2/ Hard red spring, hard red winter, and durum wheat.
- 3/ Hard red spring, hard red winter wheat.
- 4/ White wheat, hard red spring, hard red winter, and mixed wheat.

Grains: Export prices basis prompt or 30-day shipment, February 10, 1966
(All prices per bushel except grain sorghum per cwt. f. o. b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum 2
--Dollars--					
Duluth.....	No. 1 Heavy Northern Spring, 14% protein...	1.90	-	-	-
Baltimore.....	No. 2 Soft Red Winter...	1.87	1.49	3.10	1.46
Gulf.....	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	1.83 1.89	1.46 -	3.09 -	2.21 -
Pacific Northwest.....	No. 2 Western White.....	1.63	-	-	1.38

1/ The export payment rate for wheat on February 10, was 51¢ per bushel for spring wheat from Duluth, 52¢ for soft red winter from Baltimore, 53¢ for hard winter from the Gulf, and 30¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

4/ Corrected.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 14 No. 7

Hyattsville, Maryland 20782 February 18, 1966

GRAIN MARKETS WEAKEN

Cash grain markets softened in quiet trading during the week ended February 18. Except for spring wheat, most grains were generally unchanged to no more than a cent or two higher or lower. Buyers adopted a "wait and see" attitude while appraising the various factors in the "news."

Winter wheat finished unchanged to mostly 1¢ per bushel lower. Farmers remained reluctant to sell their wheat, and the boxcar shortage still hampered shippers. Export interest in both wheat and flour remained good, and there was some improvement in domestic demand. Spot offerings were ample but none too heavy. Spring wheat lost 4¢, reflecting quiet domestic bakery flour business and lower futures markets. Durum sold steady to 10¢ lower as large offerings met less active domestic and export demand. Soft white wheat dropped 7¢ per bushel but winter wheat went up 3¢ in the Pacific Northwest. Country selling and export bidding in white wheat came almost to a standstill, while new export sales boosted the hard wheat position. Rye lost 2¢, largely in sympathy with the other bread grains.

Corn prices generally eased off a cent or two behind increased offerings. Oats held steady as slightly larger receipts met ready elevator and feed mixer demand. Barley showed an easier tone with losses of 2-4¢ limited largely to the intermediate quality offerings at Minneapolis. Grain sorghum prices were unchanged with demand and offerings striking a good balance.

Soybeans closed unchanged to 1¢ per bushel lower. The spot market was supported to some extent by ready demand and early-week strength in oil and meal. However, this was offset later by various interpretations of world news, crushing and export inspection data, and liquidations which lowered the futures market. Flaxseed held steady despite smaller receipts at Minneapolis.

Special Features

Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support, repaid and outstanding by States	8-15
Grains - quantity under price support	16

NOTICE - CORRECTION

Page 10 of the February 11 issue of Grain Market News should be corrected as follows:

Under "GULF", India should be grain sorghum 2,840, Total 2,840. Italy should be corn 9,385, soybeans 1,630, and Total 11,015.

Under the July-January totals, the figures for 1965-66 (with 1964-65 figures in parenthesis) should be as follows: Corn 383,965 (263,977); Grain Sorghum 125,748 (55,617); Soybeans 157,273 (120,737); and Total 732,355 (479,095).

AN INTERPRETATION OF THE TERM, "BICOLORED SOYBEANS," ... under the U.S. soybean standards was proposed February 16. According to the proposed interpretation, yellow soybeans with black or brown streaks or splotches would be considered bicolored if the black or brown coloring covers 50 percent or more of the seedcoat. The proposed interpretation is scheduled to be published in the February 22 Federal Register.

PRICE-SUPPORT PAYMENTS TO BE MADE ON SOYBEANS PLANTED ON FEED GRAIN ACREAGE ... A modification in the 1966 feed grain program to permit participants to plant soybeans on feed grain acreage and also receive the price-support payments they would have earned if feed grains were planted was announced February 10. Under the feed grain program, participants who divert 20 percent of their feed grain base acreage to conserving uses earn price-support payments. These payments are based on the projected production on 50 percent of their feed grain base acreage. Under the modification, participants may plant all of their feed grain acreage permitted under the program to soybeans and earn their total feed grain price-support payment. The modification makes no change in the diversion provisions of the program.

Grains: Export prices basis prompt or 30-day shipment, February 17, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	wheat ^{1/}	Grade	Price	Corn : No. 2 : Yellow	Soybeans : No. 2 : Yellow	Barley : or Grain : Sorghum 2/
				-- Dollars --		
Duluth.....	No. 1 Heavy Northern					
	Spring, 14% protein...		1.86	-	-	-
Baltimore.....	No. 2 Soft Red Winter...		1.86	1.44	3.09	1.46

	Ordinary protein.....		1.83	1.47	3.07	2.21
	14% protein.....		1.89	-	-	-
Pacific Northwest.....	No. 2 Western White.....		1.58	-	-	1.37

^{1/} The export payment rate for wheat on February 17, was 47¢ per bushel for spring wheat from Duluth, 51¢ for soft red winter from Baltimore, 53¢ for hard winter from the Gulf, and 25¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Volume 14 No. 8

Hyattsville, Maryland 20782

February 25, 1966

CORN AND SOYBEANS LOWER

Cash grain markets were featured by lower corn and soybean prices for the week ended February 24. Offerings continued large with demand only moderate. Other grains were unchanged to no more than a cent or two higher or lower.

Winter wheat held steady with a continued good export interest. Mill demand was good for the better proteins. Expanded country elevator selling was readily absorbed while farmers continued a tight holding policy. Crop reports indicate that 1966 wheat is in generally good to excellent condition in Great Plains States. Spring wheat advanced 1¢ as mills were grinding at a good rate. Durum wheat was unchanged with good milling qualities selling at the top of the range. Wheat declined 1-2¢ in the Pacific Northwest with a fair amount of country selling reported. Export business was slow with all outstanding P.L. 480 business completed. Rye dropped 3¢ per bushel in a quiet market.

Corn declined 2-6¢ per bushel with the greater loss at Kansas City and Omaha. The decline reflected the rather large offerings and some reluctance on the part of exporters to pay the higher prices. Reentry of South Africa as a corn exporter was cited as a factor. Oats were unchanged to a penny lower with only a fair demand. Barley held steady at Minneapolis as offerings were readily absorbed. Barley declined 1-2¢ at Portland. Grain sorghum prices were about unchanged with light supplies and limited demand.

Soybeans declined 7-8¢ per bushel reflecting in part the lower oil and meal prices. Crushings during January hit a record of over 50 million bushels while crusher stocks increased. Increased farm selling was listed as a weakening factor. Flaxseed held steady with little activity reported.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, January	6-7
Grains - inspected receipts at selected markets, January	8-9
Wheat - CCC-owned stocks, by position, January 31, 1966	10
Soybean prices compared with soybean oil and meal prices	11
Soybeans and flaxseed - supply and distribution, monthly	11
Food for Peace Authorizations	12

SOYBEAN SUPPLIES ... on February 1 for export, crushings and carryover totaled 474 million bushels. This is about 60 million bushels more than available supplies a year ago. However, disappearance for crushing and export, September through January, totaled 350 million this season as against 305 million for the same months last season. Exports of 128 million in the four months ran 33 million above a year earlier. Crushings of over 50 million in January, the largest monthly total of record, brought the 4-month quantity to 222 million compared with 210 million in 1964-65. The outturn of oil per bushel crushed averaged 10.6 pounds for the period October through January this season. This compares with 10.8 pounds for the same months last season and 10.9 for 1963-64.

Grains: Export prices basis prompt or 30-day shipment, February 24, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
			-- Dollars --		
Duluth.....	No. 1 Heavy Northern Spring, 14% protein...	1.87	-	-	-
Baltimore.....	No. 2 Soft Red Winter...	1.85	1.43	3.00	1.46
Gulf.....	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	1.83 1.89	1.42 -	3.00 -	2.21 -
Pacific Northwest.....	No. 2 Western White.....	1.55	-	-	1.36

1/ The export payment rate for wheat on February 24, was 48¢ per bushel for spring wheat from Duluth, 50¢ for soft red winter from Baltimore, 53¢ for hard winter from the Gulf, and 23¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Feb. : 1966 2/	Jan. : 1966	Dec. : 1965	Feb. : 1965
Soybean Oil:					
Average price at crushing plant.....	Cents per lb.	12.1	11.7	11.3	12.1
Value from bushel of soybeans <u>1/</u>	Dollars	1.33	1.29	1.24	1.33
Soybean Meal 44%:					
Bulk price at Decatur.....	Dollars per ton	77.00	79.00	71.50	69.80
Value from bushel of soybeans <u>1/</u>	Dollars	1.85	1.90	1.72	1.68
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	3.18	3.19	2.96	3.01
Market price of No. 1 yellow soybeans : at Illinois Points.....	Dollars per bu.	2.86	2.77	2.62	2.95
Spread between soybean price and value: of oil and meal.....	Cents	32	42	34	6

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1964-65.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	Year beginning Sept. 1		Year beginning July 1

March 4, 1966

CASH GRAIN MARKETS WEAKER

Cash grain markets closed generally weaker for the trading period ending March 3. Movement by barges was restricted by ice flows while the boxcar shortage reduced land movement. Terminal stocks build-up was evident.

Hard winter wheat prices declined 1-4¢ per bushel while soft red winter dropped sharply and closed 7-8¢ per bushel lower. Export business was slow. Domestic millers seemed to have enough on hand to fill needs. The difficulties in the required heavy movement was a definite weakening factor. Spring wheat lost about a penny from the previous week for the lower protein wheats. A fair amount of flour business strengthened the higher proteins. Durum offerings were ample to satisfy trade needs. The lower qualities dropped 5¢ per bushel. In the Pacific Northwest, white wheat followed the easiness of the other markets and closed 1¢ per bushel lower. Dealers were not pushing for sales and farmers held for price recovery. Rye followed the downward trend of the other bread grains and lost 1-2¢ per bushel.

Corn declined 2-4¢ per bushel reflecting continued heavy offerings and less active demand. While CCC sales have been heavy, arrivals at terminals have been limited by the boxcar shortage. Exporters' interest was evident at the low points during the trading period. Oat prices varied for the period but closed not more than a penny higher or lower. Offerings were generally taken on a day-to-day basis. Barley markets remained mostly steady at Minneapolis but weakened at Portland. Grain sorghum values were mixed with prices ranging from 1¢ higher at Ft. Worth to 5¢ per cwt. lower at Kansas City.

Soybeans closed on a weak note with prices unchanged to 2¢ lower. Export demand was only fair while the oil and meal markets remained slow. Arrivals were light at most markets. Flaxseed ruled unchanged in a slow market.

1966 FEED GRAIN PROGRAM ... 405,252 farms have been signed to participate according to the first report through February 11. These reports indicate that producers have agreed to divert approximately 7 million acres of corn, grain sorghum and barley during the current crop year. The diversion is from 18,266,300 acres of feed grain base acreage on the farms signed up. Since the 1966 program does not provide for payment for the first 20 percent diversion except on farms with small bases, the total acreage for diversion from production in 1966 will be somewhat larger than the 7 million acres of diversion for which payment is to be received. The feed grain program regular signup this year is during the period January 31 through April 1.

1966 WHEAT PROGRAM ... First report on progress of the signup showed 176,929 farms have been enrolled through February 11. These farms have allotments totaling 6,288,179 acres, or 13 percent of the national total effective allotment. The current signup period in most States began January 31 and will end April 1. The signup ends on April 15 in the Northern States where most of the spring wheat is grown. Wheat producers signed up for the 1966 program will be eligible for price-support loans at a national average of \$1.25 per bushel. They will also receive domestic wheat marketing certificates, based on up to 45 percent of the farm's projected production of the allotment, valued at 100 percent of parity as of July 1 1966, less \$1.25. (February 4, 1966 parity was \$2.53 per bushel for wheat.) (Details by States will be published in later issues of Grain Market News.)

Grains: Export prices basis prompt or 30-day shipment, March 3, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}	Grade	Price	Corn	Soybeans	Barley
				No. 2	No. 2	or Grain
				Yellow	Yellow	Sorghum 2/
				-- Dollars --		
Duluth.....	No. 1 Heavy Northern					
	Spring, 14% protein...		1.86	-	-	-
Baltimore.....	No. 2 Soft Red Winter...		1.77	1.43	2.97	1.46
Gulf.....	No. 1 Hard Winter:					
	Ordinary protein.....		1.81	1.40	2.97	2.16
	14% protein.....		1.87	-	-	-
Pacific Northwest.....	No. 2 Western White.....		1.54	-	-	1.34

^{1/} The export payment rate for wheat on March 3, was 47¢ per bushel for spring wheat from Duluth, 43¢ for soft red winter from Baltimore, 50¢ for hard winter from the Gulf, and 22¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

1/ July 1, 1965-February 25, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-February 25, 1966 for corn; and September 3, 1965-February 25, 1966 for soybeans.

2/ Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of January 31, 1966, of feed grain certificates issued for crop-years 1963, 1964, and 1965 was \$3,393,682,341. Sales against the certificate pools, by crop year, were: 1963, \$119,263,666; 1964, \$345,536,061; and to date in 1965, \$224,540,013. These sales left a combined feed grain certificate value of \$2,704,342,601 as of February 25, 1966.

March 11, 1966

GRAIN MARKETS FIRM - TRADING QUIET

Most cash grain prices showed a firm to slightly higher trend in rather quiet trading during the week ended March 10. Oilseeds enjoyed the most strength.

Winter wheat closed mostly 1-2¢ per bushel higher, with the most gain in the hard wheat division. Farmers continued to display a tight holding policy. Domestic mill demand improved a little, but the spot market appeared to be more sensitive to increases or decreases in export business. Spring wheat held firm, influenced more by limited offerings than by any marked improvement in demand. Durum held steady with best demand for quality offerings. White wheat prices edged up a penny in the Pacific Northwest but trading was very slow as producers proved reluctant sellers and fresh export business was limited. Rye weakened in the face of sharply reduced offerings. Failure of export interest to develop was a depressing factor.

Corn finished unchanged to 3¢ per bushel higher behind fairly good demand. Country offerings slacked off following last week's price decline, but offerings at most markets were adequate for current demand. Oats held firm with supplies and demand about equally balanced. Barley showed little or no change in very light trading. Grain sorghum prices were mixed -- weak behind slow demand at Kansas City but steady on tight supplies at Ft. Worth.

Soybeans advanced 3¢ per bushel, reflecting good demand for spot offerings and the favorable rate of export inspections last week. However, weakness in the oil and meal markets created a cautious element in the buying picture. Flaxseed went up 4¢ in Minneapolis as buyers advanced bids in order to get additional supplies.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 14 No. 11

Hyattsville, Maryland 20782

March 18, 1966

GRAIN MARKETS MOSTLY UNCHANGED

Cash grain markets generally followed a slow trend with trading rather quiet during the week ended March 17. Prices were mostly unchanged to lower. Corn was the exception and closed above a week ago.

Winter wheat was mostly unchanged to a penny lower despite a rather good export demand. Mill buying was moderate with the flour grind reported as heavy. The new crop is making good growth with warm weather over large areas. Spring wheat declined 1-2¢ reflecting increased receipts. Country offerings continued light. Flour mills were running on full schedules. Demand for durum wheat was better with the bottom of the range 5¢ above a week ago. White wheat lost 1¢ in the Pacific Northwest as trading continued light during most of the week. Rye was down fractionally from a week ago in a dull market with no export news.

Corn advanced 1-2¢ with a fairly good demand for light offerings. Export interest continued good but lack of box cars hampered movement. Smaller CCC sales was listed as a factor in the stronger market. Oats were unchanged to a penny lower with a decided preference for better qualities. Barley averaged about unchanged with some improvement in the intermediate malting grades. Prices were unchanged to 2¢ lower at Portland. Grain sorghum held steady with little demand and little offered.

Soybeans closed unchanged to 1¢ per bushel lower reflecting in part weakness in oil and meal. Both domestic and export demand were moderate while offerings were limited. Flaxseed ruled unchanged in a slow market.

1966 Feed Grain Program - second signup report	6
Grains - CCC-owned stocks by States, February 28	7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support, repaid and outstanding by States	8-15
Grains - quantity under price support	16

1966 WHEAT PROGRAM SIGNUP ... Second report showed 311,960 farms have been signed up with a total wheat allotment of 12,381,619 acres. The second report on 1966 Feed Grain Program shows 663,291 farms signed up through February 25. These reports indicate that growers have agreed to divert for payment around 11 million acres of corn, grain sorghum and barley cropland during the current year. This is from the 31,867,700 acres of feed grain base acreage on the farms signed up. (Detail by State on the Feed Grain Program, page 6).

CCC CORN SALES ... totaled about 28 million bushels during the week ended March 11. This brought the season's total since October 1 to 343 million as against 221 million the same period last season. Reflecting the heavy sales, the CCC non-committed inventory dropped to 215 million on March 11 -- the smallest since 1953. The non-committed inventory differs from the report of CCC-owned corn by States, shown on page 7 as follows: (1) The non-committed inventory reflects sales or commitments as they are made. At present, due to box car shortages, heavy movement of grain, and other difficulties, there is a longer delay resulting in larger-than-usual discrepancy. (2) The regular inventory includes all grain in physical possession of CCC in country and terminal warehouses as well as bin sites. It also includes grain in transit and trust positions which on February 28 totaled 86.6 million bushels of corn.

PRICE SUPPORT ACTIVITIES ... through February 28 show that farmers put 167.6 million bushels of 1965-crop wheat under price support loans. This compares with 192.7 million a year earlier. Farmers had repaid loans on 79.3 million at the end of February as against 38.3 million a year ago. Through February a total of 196.9 million bushels of corn were put under price support compared with 200.6 million last year at the same date. Soybeans from the 1965 crop placed under loan through February 28 totaled 86.1 million -- more than double the 28.6 million put under from the 1964 crop. Repayments on loans of soybeans totaled 28.2 million compared with 8.2 million last year. (Details by States, pages 8-15).

Grains: Export prices basis prompt or 30-day shipment, March 17, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/} Grade	Price	Corn : No. 2 : Yellow	Soybeans : No. 2 : Yellow	Barley : or Grain : Sorghum ^{2/}
			-- Dollars --

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Volume 14 No. 12

Hyattsville, Maryland 20782

March 25, 1966

CORN AND SOYBEANS STRONGER

Cash grain markets closed on a mixed trend for the week ended March 24. Corn and soybeans prices advanced while most other grains were unchanged to lower.

Winter wheat prices regained part of the ground lost during the week but still closed 1-2¢ below the level of a week ago. Export and mill interests picked up somewhat during the latter part of the trading period. Carlot arrivals were limited. Spring wheat prices turned downward with the sharper loss in high protein wheats. Slow flour business and larger free stocks were weakening factors. A blizzard with 14 inches of snow closed the Minneapolis Grain Exchange on Wednesday. White wheat prices remained steady in the Pacific Northwest. Market activities were featureless with limited buying or selling. The March 31 loan redemption deadline was a steadying factor. Rye prices edged upward a penny in Minneapolis.

Cash corn markets were generally stronger with prices 3¢ per bushel higher. Offerings remained light and good quality corn was actively sought. While CCC sales so far this crop year totaled about 119 million bushels more than a year ago, export inspections during the same period totaled around 96 million bushels more. Oats were unchanged to 2¢ per bushel lower. Receipts were large enough to satisfy the rather slow demand. Barley closed on a mixed note with prices unchanged to 4¢ lower. Grain sorghum eased off 1-2¢ per cwt. reflecting a slow interest for moderate spot offerings.

Soybean prices turned sharply upward and closed 6-7¢ per bushel higher. Market strength reflected increased oil bookings for overseas shipments. Most stocks at principal export markets are ear-marked for foreign delivery. Flaxseed held at the same price as a week ago with supplies rather generous.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, February	6-7
Grains - inspected receipts at selected markets, February	8-9
1966 Wheat Program - second signup report	10
Grains - prospective U. S. plantings for 1966	11
Soybeans and flaxseed - supply and distribution, monthly	11
Food for Peace Authorizations and Agreements	12

FARMERS PLANTING INTENTIONS ... indicate a 2 percent increase in the corn acreage and 10 percent in the barley acreage for 1966, according to the Crop Reporting Board. If farmers carry out their March 1 intentions, the soybean acreage at 37 million acres will be 5 percent above 1965 and 31 percent above average. Prospective plantings of oats are 1 percent below 1965. Spring wheat plantings may total a little above average with Durum wheat, at 2.3 million acres, about the same as last year but 11 percent above average.

CANADIAN PLANTING INTENTIONS ... indicate that Canadian farmers intend to plant 29.6 million acres to wheat in 1966 -- an increase of 5 percent over 1965 but slightly less than the record in 1964. The acreage to oats is expected to remain unchanged while the barley acreage is expected to increase by 18 percent. The rye acreage will be down 9 percent on the basis of plantings last fall and intentions for the spring rye. Flaxseed acreage forecast at 2.1 million acres is 5 percent less than the 1965 acreage.

AMENDED WHEAT EXPORT REGULATIONS ... under provisions of the Food and Agriculture Act of 1965 provide that export marketing certificates will be required on wheat exported after July 1, 1966. Export payments will be made when U.S. prices are above world prices to keep our wheat competitive. When U.S. prices are below the world level, an export marketing certificate will be required with represents the difference between the prices.

"BICOLORED SOYBEANS" ... will be considered bicolored only if the black or brown coloring covers 50 percent or more of the seedcoat according to an interpretation which was originally announced February 16. Merchandisers and soybean specialists indicate that the streaks or splotches are appearance factors only and are not known to be related to oil quality or content.

Grains: Export prices basis prompt or 30-day shipment, March 24, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
			-- Dollars --

Gulf.....	No. 1 Hard Winter:				
	Ordinary protein.....	1.81	1.42	3.03	2.13
	14% protein.....	1.87	-	-	-
Pacific Northwest...	No. 2 Western White....	1.54	-	-	1.33

1/ The export payment rate for wheat on March 24, was 37¢ per bushel for spring wheat from Duluth, 44¢ for soft red winter from Baltimore, 51¢ for hard winter from the Gulf, and 21¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Grain Market News

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION
UNITED STATES DEPARTMENT OF AGRICULTURE

CONSUMER AND MARKETING SERVICE

Volume 14 No.13

Hyattsville, Maryland 20782

April 1, 1966

GRAIN PRICES MOSTLY LOWER

Cash grain markets generally declined during the week ended March 31. Congestion at port elevators, boxcar shortages, threat of rail strike and some uncertainty regarding export demand were weakening factors.

Winter wheat declined 1-2¢ reflecting increased offerings and a somewhat easier domestic and export demand. Overseas sales were slow due in part to lack of assurance of date of delivery. The 1966 crop was reported in generally good condition. Spring wheat dropped 3-4¢ for the high protein types while the ordinary and 13 percent protein held about steady at last week's level. Receipts were large with space cramped at Duluth as the trade anxiously awaited opening of the Great Lakes shipping season. Durum was down 2-5¢ as buyers were more selective with larger discounts for moisture and damage. White wheat went up a penny in the Pacific Northwest but failed to encourage much selling by producers. Rye closed 4¢ lower reflecting large supplies and no export business.

Corn dropped 2¢ per bushel at most points with supplies plentiful. Demand from feed mixers was slow with commercial interest lagging. Oats were easy with prices unchanged to 2¢ lower. Buying was reported as more selective. Barley markets weakened with prices mostly 1-2¢ per bushel lower. Receipts were not large but demand was on the slow side. Grain sorghum prices were mixed -- weak behind increased offerings at Ft. Worth but steady with fair demand at Kansas City.

Soybean prices dropped 4¢ reflecting in part the weak market for oil and meal. Possible export of around 150,000 tons of oil to India was a strengthening factor. The 1966 soybean crop will be supported at an average of \$2.50 per bushel which is 25¢ above the rate for the past three years. Flaxseed held steady at Minneapolis despite larger receipts.

1966 Feed Grain Program - third signup report	10
1966 Wheat Program - third signup report	11

THIRD REPORT ON 1966-FEED GRAIN PROGRAM ... shows 903,938 farms signed to divert about 22 million acres from production of corn, grain sorghum and barley. This includes 13.9 million acres of voluntary diversion for payment in excess of the required acreage diversion. The total base on signed farms is 45,966,500 acres of feed grain producing land. Of the 13,893,900 acres of agreed diversion for payment, 10,437,300 acres is corn base, 2,698,100 acres is sorghum, and 758,500 acres is barley.

THIRD REPORT ON 1966-WHEAT PROGRAM ... shows 452,530 farms participating with 39 percent of the national wheat acreage allotment for the current year. The farms signed up through March 11 have wheat allotments totaling 19,700,000 acres. The agreed voluntary acreage diversion for payment on these farms totals 1,091,772 acre

1966-67 RESEAL PROGRAM ... for wheat, grain sorghum, barley and oats was announced. At the same time the Department is calling price-support loans on the oldest crop of wheat, grain sorghum, barley and oats now under reseal. This is a continuation of the reseal policy of the past few years. The reseal will include the 1964 and 1965 crops of wheat, grain sorghum, barley and oats; and the 1963 crops of wheat and grain sorghum. Loans on 1962-crop of wheat and grain sorghum and 1963-crops of barley and oats now under reseal will not be extended. There will be no reseal program for 1965-crop soybeans and the decision regarding reseal programs for corn has not been made.

Grains: Export prices bases prompt or 30-day shipment, March 31, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
			-- Dollars --		
Duluth.....	No. 1 Heavy Northern Spring, 14% protein	1.81	-	-	-
Baltimore.....	No. 2 Soft Red Winter	1.72	1.44	3.01	1.46
Gulf.....	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	1.79 1.85	1.42 -	3.00 -	2.13 -
Pacific Northwest....	No. 2 Western White	1.55	-	-	1.30

1/ The export payment rate for wheat on March 31, was 35¢ per bushel for spring wheat from Duluth, 44¢ for soft red winter from Baltimore, 49¢ for hard winter from the Gulf, and 52¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

United States Wheat: Supply and Distribution

Item	1965-66	1964-65	1959-63 Average
--Million bushels--			
Carryover stocks, July 1	817.7	901.2	1,307.3
Production	<u>1,326.7</u>	<u>1,290.6</u>	<u>1,189.8</u>
Total supply	2,144.4	2,191.8	2,497.1
Estimated quantity for feed, seed, and industrial use for season <u>1/</u>	165.0	158.6	87.9
Quantity remaining for milling, export, or carryover	1,979.4	2,033.2	2,409.2
Disappearance July through March:			
Milled for flour	<u>2/</u> 430.0	427.5	451.4
Exported as grain	<u>2/</u> 564.8	453.1	410.4
Total milled and exported	994.8	880.6	861.8
Balance on April 1, for milling export or carryover	984.6	1,152.6	1,547.4

Supplementary information:			
Imports, July-March	<u>2/</u> 0.3	0.6	3.6
Exports of flour in grain equivalent, July-March	<u>2/</u> 51.9	59.2	73.9

1/ Includes an estimate for breakfast food which is not included in quantity of wheat milled for flour. Does not include imports, the major portion of which is used for feed.

2/ Data for March estimated.

Average prices received by farmers, effective parity, and support rates
(Dollars per bushel except grain sorghum per cwt.)

March.....	11.3	1.21	71.50	1.69	2.90		2.82	.08

1/ Based on reports of the Bureau of the Census of quantity crushed and produced. During 1964-65 a bushel of soybeans yielded an average 10.9 pounds of oil and 47.8 pounds of meal and for 1965-66 to date: 10.7 pounds of oil and 47.4 pounds of meal.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Food for Peace Authorizations,
March 23-29, 1966

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars

BREAD GRAINS AND SOYBEANS ADVANCE

Wheat, rye, and soybean prices registered moderate gains for the week ended April 7. Other cash grain markets showed little or no change.

Winter wheat advanced 3-4¢ per bushel, influenced mainly by good export demand and fair domestic mill interest. Strength in the wheat futures market and prospects for a big export season as a result of world food shortages also supported the cash market. Spring wheat went up 4¢ but durum held steady. Spring wheat, like winter wheat, found good demand from exporters as well as mills. White wheat gained 3¢ in the Pacific Northwest but farmers continued to display a firm holding policy. Rye advanced 4¢ in quiet trading with the upswing largely reflecting strength in other grains.

Corn finished unchanged to a penny a bushel higher behind good demand for lighter offerings. Oats ruled steady to a cent or two higher, reflecting strength in corn and light spot offerings. Barley was not much changed in limited trading. Grain sorghum showed little change with not much demand for light offerings.

Soybeans chalked up advances of 6-8¢ per bushel. Spot sales continued light, and demand from processors and elevators was good. Support also stemmed from strength in oil and meal, favorable export inspection figures, and continued large crushings. Many traders focused their attention toward next week's report of stocks on farms. Flaxseed held steady.

Corn - U. S. price support operations	6
Grains - CCC dispositions	7
Food for Peace Authorization and Agreements	8

1966 SOYBEAN CROP ... will be supported at a national average of \$2.50 per bushel. This compares with the support of \$2.25 per bushel which has been in effect since 1961. A one-week extension of the feed grain signup period through April 8 in soybean producing areas in 26 States was also announced. This is expected to give farmers additional time to decide what plantings will be most profitable for them in 1966.

1966 FLAXSEED CROP ... will be supported at a national average of \$2.90 per bushel, unchanged from last year. In Texas, a special purchase program for flaxseed is being made available immediately. Since harvest in that State is much earlier than other major producing States, and because moisture conditions make possible only short-time storage of flaxseed there, the Texas action is a continuing consideration.

CCC CORN SALES for the week ended April 1 totaled a little over 13 million bushels. This brought the season's total since October 1 to 378 million bushels -- well above the 249 million bushels sold during the same period last season but considerably under the 1961-62 record of 673 million bushels. With the heavy sales, CCC's April 1 non-committed corn inventory dropped to 175 million bushels -- the smallest in 15 years and much below the record almost 1.4 billion bushels owned on October 1, 1961. This season's heavy sales have been well absorbed despite last year's record corn crop. Favorable feeding ratios encouraged liberal feed usage of corn, while exports for the first six months this season totaled 355 million bushels -- 94 million bushels larger than the previous record. Cash corn prices, meanwhile, averaged \$1.26 per bushel for No. 2 Yellow at Chicago on an October-March basis. This compares with an average of \$1.27 for the same months last season and \$1.22 for 1963-64.

Grains: Export prices basis prompt or 30-day shipment, April 7, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley

Pacific Northwest.....	No. 2 Western White.....	1.58	-	-	1.30

^{1/} The export payment rate for wheat on April 7, was 37¢ per bushel for spring wheat from Duluth, 49¢ for soft red winter from Baltimore, 52¢ for hard winter from the Gulf, and 23¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

1/ Includes 14 million bushels of 1937 corn sealed for the first time in 1938 under a short-term program.

2/ Mostly supply inventory. Records do not show price support and supply separately.

3/ Support rates for noncomplying farmers in the commercial area were: \$1.25 for the 1956-57 crop year; \$1.10 for the 1957-58 crop year, and \$1.06 for the 1958-59 crop year.

4/ Preliminary estimate assumes about half of the corn resealed or still outstanding will be delivered eventually to CCC.

NOTE: Stocks in all positions, production and season average farm prices reported by Crop Reporting Board. CCC sales, stocks and price support activities from Agricultural Stabilization and Conservation Service and data published in Grain Market News.

Grains: CCC dispositions 1/
(All data in 1,000 bu. except grain sorghum in 1,000 cwt.)

1/ July 1, 1965-April 1, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-April 1, 1966 for corn; and September 3, 1965-April 1, 1966 for soybeans.
2/ Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of February 28, 1966, of feed grain certificates issued for crop-years 1963, 1964, and 1965 was \$3,504,810,739. Sales against the certificate pools, by crop year, were: 1963, \$119,263,666; 1964, \$345,536,061; and to date in 1965, \$372,679,588. These sales left a combined feed grain certificate value of \$2,667,331,424 as of April 1, 1966.

GRAIN MARKET SHOWS MIXED TREND

Corn and soybean prices strengthened but spring wheat and barley weakened. Other cash grains showed little or no change for the week ended April 14.

Winter wheat closed about unchanged. Prospects for an 8 percent larger crop of 1.1 billion bushels this year and scattered showers in the winter wheat country had a weakening influence. This was offset to some extent, however, by continued strong export demand, fair domestic mill inquiry, and the boxcar shortage. Spring wheat lost 1-3¢ per bushel with the high proteins off most. Demand was good but quickly satisfied. Durum went down 3¢ behind slower demand. White wheat declined a cent or two in slow trading but hard winter gained 2-3¢ on increased exports in the Pacific Northwest. Rye held steady in Minneapolis as flour business was dull and exports remained small.

Corn advanced 1-3¢ per bushel with broad demand from both processors and elevators. Oats ruled firm, supported by light offerings and strength in corn. Barley lost 2¢ in the Midwest where heavier offerings met slower demand. Grain sorghum held steady.

Soybeans edged up 1-2¢ per bushel, reflecting good demand and strength in oil and meal. Smaller than expected April 1 farm stocks of 150 million bushels and last week's export inspections of nearly 5 million bushels stimulated buying and prompted some traders into making statistical projections toward the April 25 report of stocks in all positions. Flaxseed was unchanged.

EXPORT GRAIN INSPECTIONS ... hit a near-record 202.1 million bushels (5.3 million metric tons) during March. This was only 64,000 bushels less than the record 202.2 million bushels inspected in November 1965 -- the largest quantity of grain ever inspected for export in a single month. March inspections reflected heavy shipments of wheat to India and of corn, grain sorghum, and soybeans to Europe and Japan. Total grain inspected for export so far this season (July 1965-March 1966) now stands at an all-time high of 1.5 billion bushels (39.5 million metric tons) -- some 400 million bushels more than the same period in 1964-65 and 358 million bushels more than the previous record in 1963-64. March wheat export inspections reached a record 86 million bushels, nearly 16 million more than in February and some 3 million bushels more than the previous monthly record set in March 1964. Inspections of grain sorghum also hit an all-time high of 26 million bushels in March. Export inspections of corn and soybeans, while not at record levels, ran much larger than in most other recent months. During the first nine months of this season (July 1965-March 1966), a record 574 million bushels of wheat (grain only), 497 million bushels of corn, 197 million bushels of soybeans, and 174 million bushels of grain sorghum have been inspected for export. (See details on pages 6-11).

AMENDED FEES AND CHARGES FOR CERTAIN GRAIN DIVISION INSPECTION SERVICES ... were announced this week. Amendments to regulations under the Agricultural Marketing Act of 1946 set a uniform hourly rate for inspection performed on most commodities regardless of the type of service, location of the plant, mill, or elevator, or the time the service is performed. This amendment, which becomes effective May 15, does not affect charges for inspection of wheat, corn, soybeans, and other grains under the U.S. Grain Standards Act or for inspection of seed under the Federal Seed Act. The new schedule of fees and charges was published in the Federal Register on April 9.

Grains: Export prices basis prompt or 30-day shipment, April 14, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}	Grade	Price	Corn	Soybeans	Barley
				No. 2	No. 2	or Grain

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Grain Market News

**WEEKLY
SUMMARY
AND
STATISTICS**

**GRAIN DIVISION CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE**

Volume 14 No. 16

Hyattsville, Maryland 20782

April 22, 1966

GRAIN MARKET STRENGTHENS

Most grain prices closed firm to higher during the week ended April 21. Spring wheat and soybeans led the upswing. Rye showed independent weakness.

Winter wheat finished 1-2¢ per bushel higher, supported mainly by concern about how much damage unseasonably low temperatures did to the growing crop in the Southwest. Good domestic and export demand for continued tight supplies was also a strengthening influence. Spring wheat advanced 4¢ behind good mill demand and a late-week improvement in flour business. Durum held steady. White wheat prices softened in the Pacific Northwest where both buyers and sellers showed little interest in trading. Rye lost 2¢ in the face of fair mill demand.

Corn finished mostly unchanged to a cent or two per bushel higher. Demand held up well with most elements of the trade in the spot market. Planting of the new crop made favorable progress in most areas. Oats ruled firm, reflecting a good balance between supply and demand and strength in corn prices. Barley was generally unchanged in quiet trading. Grain sorghum held steady in Ft. Worth but advanced 4-6¢ per cwt. with strong demand for light offerings at Kansas City.

Soybeans went up 3-4¢ per bushel, reflecting ready outlets for generally light spot offerings. Exceptional strength in the futures market for soybeans and soybean meal also gave support to the cash market. Soybean futures prices moved to new highs for the season for all but May contracts. Soybean inspections for export declined to about 3 million bushels last week -- the smallest weekly total since early January. Flaxseed held steady.

PROPOSED INTERPRETATION FOR STRIPED CORN ... was announced this week. The proposed interpretation of the term "other color" under the U. S. corn standards will ease restrictions on striped corn. According to the proposed interpretation, yellow corn with dark red stripes and white corn with pink stripes would be considered "other color" if the stripes covered 50 percent or more of the kernel. Under existing definitions, yellow corn containing more than "a slight tinge of red" and white corn containing more than "a slight tinge of light straw or pink color" are considered other-colored. U. S. corn standards specify that yellow corn with over 5 percent other-colored corn and white corn containing more than 2 percent other-colored corn fall into the class mixed corn. The proposal, which was published in the Federal Register April 16, also would allow those who wish to buy corn with limited amounts of striped kernels to obtain grading certificates, upon request, showing the percentage of kernels with stripes.

CORRECTION

The totals in the table "Grains: CCC-owned stocks, by States, March 31, 1966" on page 12 of the April 15, 1966, issue of GRAIN MARKET NEWS should be corrected as follows: Rye 4,737,528; oats 37,823,050; barley 11,264,403; grain sorghum 412,499,456; and flaxseed 3,767,694. Totals for wheat, corn, and soybeans were correct as printed.

Grains: Export prices basis prompt or 30-day shipment, April 21, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 : Yellow	No. 2 : Yellow	:or Grain Sorghum 2
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein	1.87	-	-	-
Baltimore	No. 2 Soft Red Winter	1.78	1.42	3.09	1.46
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.84	1.40	3.08	2.13
	14% protein	1.90	-	-	-
Pacific Northwest	No. 2 Western White	1.56	-	-	1.26

1/ The export payment rate for wheat on April 21 was 37¢ per bushel for spring wheat from Duluth, 53¢ for soft red winter from Baltimore, 44¢ for hard winter from the Gulf, and 21¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 9 No. 2

Hyattsville, Maryland 20782

April 27, 1966

Grain prices generally declined during the January-April period with the sharpest loss in soft red winter wheat. Soybeans and flaxseed were the exception and made substantial gains. Wheat prices in April were well above a year ago while corn, soybeans and grain sorghum averaged lower. Stocks of feed grains on April 1 were 1 percent more than last year but 12 percent below average. Wheat stocks were down 21 percent while soybean holdings were 8 percent greater than a year earlier. Rye and flaxseed stocks were up sharply from a year ago.

WHEAT ... prices declined in the January-April period despite near record exports. Hard winter and spring wheat went down an average of 1-2¢ per bushel while soft red winter dropped 6-8¢ during the period. Soft white wheat declined 7¢ in the Pacific Northwest while hard winter went up 6¢ per bushel during the four-month period. Stocks of wheat in all positions, April 1, totaled 901 million bushels -- 245 million less than a year ago. Of the total stocks, Commodity Credit Corporation owned 450 million, a drop of 190 million from last year. Less than 70 million remained under price support at the end of March, about half that of a year earlier. Exports of wheat and flour, July through March, totaled about 620 million bushels. While this is slightly below the record of 623 million in 1963-64 it is sharply above the 512 million exported last season. Canadian stocks of wheat on March 31 totaled 750 million bushels compared with 718 million a year earlier. Wheat exports from United States, Canada, Argentina and Australia, July through March, totaled 1,350 million bushels -- 90 million more than the previous record in 1963-64 and 250 million more than the same months last year.

RYE ... prices dropped 7¢ per bushel at Minneapolis from January to April due in part to the limited demand for the large stocks. Rye stocks of 24.7 million bushels were 40 percent above a year earlier and the largest since 1944. Nearly 5 million bushels of the 1965 crop remained under price support while about the same amount was owned by CCC. Exports of rye totaled 1.7 million bushels -- about the same as last year but sharply below average. Consumption of rye for alcohol at 3.3 million bushels and milling for flour at 3.9 million were both above last year. The quantity remaining for feed at 8.3 million compares with 8.8 million used for feed July through March 1964-65.

CORN ... prices at the farm, January through March, averaged 3¢ per bushel below last year due in part to the larger available supplies. Market prices strengthened during April but averaged 2¢ below April 1965. Stocks of corn in all positions on April 1 totaled 2.9 billion bushels, slightly above last year but 445 million more than the April 1 5-year average. Reflecting the heavy sales, CCC non-committed inventory dropped to 175 million on April 1 -- the smallest in 15 years. Farmers put only 205 million bushels of the record 1965 crop under price support by the end of March. Disappearance of corn the first six months of the season at 2,442 million bushels was 192 million above last year. Exports of 358 million bushels the

first half of the season were nearly 100 million above a year earlier. About 98 million bushels of corn were used for wet milling -- slightly above last year. Corn remaining for feed totaled 1,969 million bushels, an increase of 92 million over the same period a year ago. Animal units for 1965-66 are estimated at 169.1 million compared with 167.1 million for 1964-65. Feeding of corn per animal unit totaled 11.6 bushels the first half of the season as against 11.2 last year.

OATS ... prices declined 2¢ per bushel in the January-April period due mainly to the larger stocks. Market prices in April were 1-2¢ below April 1965. Disappearance, mainly for feed, July through March, totaled 696 million bushels -- 29 million below the same period last year and the smallest in 25 years of record. Exports of nearly 24 million the first nine months compare with 3 million last year and 18 million the 5-year average. Canadian stocks of oats, March 31, totaled 247 million as against 241 million last year.

BARLEY ... prices generally declined in the January-April period. Despite the decline most market prices in April were above a year earlier. However, choice malting barley averaged 3¢ below a year ago at Minneapolis. Barley stocks in all positions totaled 199 million -- the smallest April 1 holdings since 1954. Disappearance of 320 million bushels, July through March, was 20 million less than last year due to the smaller feed use. Exports of 52 million were 14 million more while industrial use, mainly malt liquors increased by 2 million bushels. Stocks of Canadian barley, March 31, totaled 192 million -- 20 million less than a year ago.

GRAIN SORGHUM ... prices at the farm averaged 15¢ per cwt. below a year ago for the first three months of the calendar year. Market prices in April averaged 16¢ per cwt. below April 1965. Stocks of 407 million cwt. (586 million bushels) in all positions on April 1 were 25 million cwt. less than a year earlier. Of the total stocks, CCC owned 231 million with 75 million under loan or resale. Record exports of nearly 70 million cwt. were double those of a year ago. The quantity remaining for feed at 212 million cwt. was 37 million more than for the same months of 1964-65.

SOYBEAN ... prices advanced 11-12¢ per bushel during the January-April period reflecting active export and domestic demand. Despite the advance, prices in April were 5-9¢ per bushel below April 1965. Stocks of 376 million bushels were 29 million less than a year ago. Crushings of 316 million bushels the first six months compare with 289 million crushed the same period last season. Record exports of 166 million were 35 million below last year. By the end of March, farmers had nearly 45 million bushels of 1965-crop soybeans remaining under price support.

FLAXSEED ... prices advanced 9¢ per bushel during the first four months of the calendar year. Despite the gain, prices in April were 3¢ below a year earlier. Stocks of flaxseed on April 1 totaled nearly 25.9 million bushels as against 17.5 million last year. Exports of flaxseed, July through March, at 3.3 million were somewhat below the 5.9 million exported last season. Crushings of flaxseed totaled 16.6 million -- only slightly less than for the same period a year ago.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

- 1/ Quantity of current crop placed under support minus the quantity of loans repaid.
 2/ Quantity of previous crops outstanding under resale programs.
 3/ Total grain in all positions as reported by Crop Reporting Board.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks are preliminary. January-March 1966 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

CONSUMER AND MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 17

Hyattsville, Maryland 20782

April 29, 1966

SOYBEAN PRICES ADVANCE

Soybean prices advanced sharply during the week ended April 28. Soft red winter wheat and rye declined while most other grains moved within narrow limits.

Hard winter wheat finished unchanged to 1¢ higher with good mill and export demand for rather light offerings. Crop prospects continued favorable with rains reported over wide areas. Soft red winter wheat declined 4¢ in a slow market. Spring wheat declined a penny reflecting fairly large receipts. Flour sales increased as buyers covered additional needs. Durum was unchanged in slow trading. White wheat was unchanged to 1¢ lower in the Pacific Northwest with reports of dull to fair trading. Rye dropped 6¢ reflecting the large April 1 stocks and the continued slow demand.

Corn prices averaged about unchanged with demand steady to slightly stronger. Planting made good progress in the Southeast but cold temperatures and rain slowed activity west of the Mississippi. Oats declined 2¢ despite limited arrivals. Barley showed little change during the week with slightly larger receipts well absorbed. Grain sorghum prices were 1-2¢ per cwt. lower at Kansas City behind easier demand but held steady at Ft. Worth.

Soybeans advanced 8¢ reflecting the generally good demand and reports of smaller-than-expected stocks on April 1. Oil and meal also advanced and trade reports indicate active buying of soybeans by a number of processors. Flaxseed remained unchanged at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Grains - U. S. stocks by position, April 1	6
1966 Feed Grain Program - fifth signup report	7
Food for Peace Authorizations and Agreements	8

PRICE-SUPPORT LOAN MATURITY DATES SET FOR 1966 CROPS ... The dates for corn, soybeans and rice are unchanged from those for the 1965 crops, while for others the dates range from one to four months later. Application for price-support loans will not be required for 1966 crops. Loans can be obtained on eligible crops up until one month prior to the respective loan maturity dates. Commodities not placed under loan may be purchased by Commodity Credit Corporation upon timely notification at country ASC offices. Following is the schedule of loan maturity dates for 1966 crops: Barley April 30 in all States, except May 31 in Alaska, Idaho, Minnesota, Montana, North Dakota, Oregon, South Dakota, Washington, Wisconsin and Wyoming; Corn July 31 in all States; Grain Sorghum July 31 in all States, except June 30 in Oklahoma and Texas; Oats April 30 in all States, except May 31 in Alaska, Idaho, Maine, Michigan, Minnesota, Montana, North Dakota, Oregon, South Dakota, Washington, Wisconsin, and Wyoming; Rye April 30 in all States; Soybeans July 31 in all States; Wheat April 30 in all States, except May 31 in Idaho, Minnesota, Montana, North Dakota, Oregon, Washington and Wyoming; Flaxseed April 30 in all States except May 31 in Minnesota, North Dakota, South Dakota and Wisconsin.

FIFTH REPORT ON 1966 FEED GRAIN PROGRAM SIGNUP ... shows 1,411,510 farms whose intended total diversion is 34,588,000 acres, on the basis of State reports through April 8. This signup is about 5 percent less than the 1,489,222 in 1965 but well above any other year. The signup for the 1966 feed grain program as of April 8 was virtually completed in all except about 14 northern and western States which finished on April 15. (Details by States, page 7).

NOTE: Table, "CCC-owned wheat by classes," on page 6 of April 22 Grain Market News - first column should be hard red spring and second column hard red winter. On page 7 March soybean exports should be 21,556,000 bushels and grain sorghum 28,260,000 bushels. Cumulative totals corrected on page 5 this week.

Grains: Export prices basis prompt or 30-day shipment, April 28, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

	14% protein	1.91	-	-
Pacific Northwest	No. 2 Western White	1.56	-	-
				1.30

1/ The export payment rate for wheat on April 28, was 39¢ per bushel for spring wheat from Duluth, 49¢ for soft red winter from Baltimore, 55¢ for hard winter from the Gulf, and 20¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION

CONSUMER AND MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 14 No. 18

Hyattsville, Maryland 20782

May 6, 1966

GRAIN PRICES SHOW MIXED TREND

Cash grain markets showed a mixed trend during the week ended May 5. Spring wheat, corn, soybeans and rye posted lower prices while winter wheat, flaxseed and grain sorghum advanced. A 15 percent increase in the 1967 wheat allotment was announced. The 1967 wheat allotment will be 59.3 million acres as against 51.6 million for the 1966 crop.

Winter wheat advanced 1-2¢ per bushel reflecting good export demand for immediate needs. Mill demand was good for the better proteins. Producer selling remained limited. Crop prospects were generally good but extent of damage from recent freeze is not yet known. Spring wheat declined 1-2¢ reflecting in part the very light flour sales. Demand for choice cars remained good. Durum held at last week's level in dull trading. White wheat in the Pacific Northwest was unchanged to a penny lower with both export and mill demand slow. Rye lost another cent, dropping to new lows for the season, reflecting large stocks and little export interest.

Corn dropped 1-2¢ behind the weaker demand. Most receipts were on previous bookings. Exports continued large but buying was slow. Rains delayed planting in most areas. Oats declined a penny at Chicago in slow trading but advanced 1¢ at Minneapolis reflecting smaller receipts. Barley was mostly steady with the smaller offerings readily absorbed. Grain sorghum advanced 1-2¢ per cwt. reflecting the broad demand from feed mixers and exporters.

Soybeans declined 3¢ per bushel due in part to a reaction from the sharp advance of last week. Both oil and meal closed on a weak tone with limited export interest in oil. Soybean receipts continued light with a fair processor demand. Flaxseed gained 2¢ reflecting small receipts and higher linseed meal prices.

Paraguay	Apr. 27	-	Wheat	1.5 mil. bu.	2,328

1/ All varieties of soft red winter wheat, hard red spring, and durum wheat.

2/ Hard red spring, hard red winter, and durum wheat.

Grains: Export prices basis prompt or 30-day shipment, May 5, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u> Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <u>2/</u>
-- Dollars --					
Duluth	No. 1 Heavy Northern Spring, 14% protein..	1.85	-	-	-
Baltimore	No. 2 Soft Red Winter..	1.74	1.42	3.16	1.48
Gulf	No. 1 Hard Winter: Ordinary protein	1.85	1.39	3.14	2.13
	14% protein	1.91	-	-	-
Pacific Northwest	No. 2 Western White...	1.55	-	-	1.30

1/ The export payment rate for wheat on May 5, was 40¢ per bushel for spring wheat from Duluth, 46¢ for soft red winter from Baltimore, 55¢ for hard winter from the Gulf, and 20¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

^{1/} July 1, 1965-April 29, 1966 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1965-April 29, 1966 for corn; and September 3, 1965-April 29, 1966 for soybeans.

^{2/} Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported value, as of March 31, 1966 of feed grain certificates issued for crop-years 1963, 1964, and 1965 was \$3,614,265,096. Sales against the certificate pools, by crop year, were: 1963, \$119,263,666; 1964, \$345,536,061; and to date in 1965, \$397,242,674. These sales left a combined feed grain certificate value of \$2,752,222,695 as of April 29, 1966.

Volume 14 No. 19

Hyattsville, Maryland 20782

May 13, 1966

GRAIN MARKETS STRENGTHEN

Grain markets closed firm to slightly stronger for the week ended May 12. However, gains seldom amounted to more than a cent or two.

Winter wheat finished 1-2¢ per bushel higher. Strength in the futures market, reports of freeze damage, and weather uncertainties were market factors. Export demand held up fairly well, but domestic mill demand was lighter in line with nearness of the new crop. Winter wheat production is now estimated at nearly 1.1 billion bushels -- 2 percent below the April 1 forecast but 7 percent above 1965. The first car of new-crop wheat arrived at Houston, Texas, this week, but general harvest is still about a month away. Spring wheat edged up a penny and durum held steady. White wheat held steady in dull trading in the Pacific Northwest. Rye advanced 2¢, bolstered by the lack of offerings and strength in most other grains.

Corn was mostly unchanged, supported by fairly good demand from the feed trade and exporters, and the boxcar shortage which continued to hamper shipments for the spot market. Oats went up a couple of cents at principal markets as limited spot offerings failed to satisfy demand. Barley held steady in quiet trading. Grain sorghum showed little change at Ft. Worth but weakened behind limited buying interest at Kansas City.

Soybeans moved up 2¢ reflecting strong demand, favorable export inspections, and continued trade expectations for a close balance between supply and demand by the end of the crop year. Flaxseed was unchanged.

Special Features

1966-crop wheat and feed grains - final signup report through April 15, 1966	13-15
U. S. Grains - inspection for export from Canadian ports, April	16

FINAL REPORT ON 1966 WHEAT PROGRAM ... shows that 827,662 farms having 85 percent of the eligible national effective allotment for the current crop year will be participating in the 1966 wheat program. Farms signed for the 1966 program total 7 percent less than in 1965 and have wheat allotments totaling 42,364,053 acres -- 5 percent less than in 1965. Final report also shows a total of 2,050,055 acres of agreed diversion for payment. No payment is being made for required diversion of 15 percent which is reflected in each wheat farm's 1966 allotment. Spring wheat growers were asked not to divert additional acreage.

FINAL REPORT ON 1966 FEED GRAIN PROGRAM ... indicates that total farms signed up, their agreed total acreage diversion, and base acres on signed farms each is only slightly below records established last year. Farms signed up for 1966 total 1,470,480 -- 1 1/4 percent less than in 1965. Total acreage diversion agreed for 1966 is 36,177,800 acres -- 1 1/2 percent less than in 1965. Base acreage on signed farms (83,617,100 acres) as compared to that on all farms is 64.3 percent, or 1 percent less than in 1965. Sixty percent of the total corn base acreage is on farms signed up for the 1966 program. For grain sorghum, the figure is 77 percent; for barley, it is 69 percent. Under a change in the 1966 program, participants can plant soybeans on a part of their feed grain acreage and also receive the price-support payment they would have earned if feed grains were planted.

Grains: Export prices basis prompt or 30-day shipment, May 12, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein...	1.87	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.74	1.44	3.17	1.48
Gulf	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	1.86 1.92	1.41 -	3.16 -	2.13 -
Pacific Northwest.....	No. 2 Western White.....	1.55	-	-	1.30

^{1/} The export payment rate for wheat on May 12, was 43¢ per bushel for spring wheat from Duluth, 46¢ for soft red winter from Baltimore, 56¢ for hard winter from the Gulf, and 21¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

CONSUMER AND MARKETING SERVICE

Volume 14 No. 20

Hyattsville, Maryland 20782

May 20, 1966

WHEAT PRICES ADVANCE

Wheat markets generally advanced during the week ended May 19 reflecting the unfavorable weather. Rye also advanced but other grains moved within narrow limits and closed at about last week's level.

Winter wheat advanced 3¢ per bushel due in part to damage to the Kansas crop, limited supplies of old crop and delays in harvesting of the new crop. In Western Kansas, sharp freezes and dry weather caused additional damage over large areas. Car and truck receipts were light while mill and export demand was stronger. Spring wheat advanced 3¢ as wet weather delayed planting which may delay the harvest. Trading in flour was slow with mill demand for wheat limited. Durum declined 2¢ with a wide range in prices. White wheat was unchanged to a penny lower in the Pacific Northwest. Rye gained 5¢ in partial reaction to earlier sharp losses and smaller receipts.

Corn averaged about unchanged with a penny gain at Chicago offset by a loss of a penny at Omaha. Demand was good at Chicago and Minneapolis with smaller stocks and smaller offerings. Despite rainy, cool weather, planting progressed in most areas. Oats declined 1¢ as buying was limited to immediate needs. Barley prices showed little change except for a sharp drop to a new crop-basis in Stockton. Grain sorghum prices were unchanged to 2¢ per cwt. lower with demand narrow for limited offerings.

Soybeans advanced 1-2¢ per bushel reflecting a continued good domestic and export demand. Marketings continued light. Product prices were slightly easier at the close. Flaxseed declined 2¢ in a slow market.

Special Features

Grains - export prices at specified points	2
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support, repaid, delivered and outstanding by States	6-13
Grains - quantity under price support	14
Food for Peace Authorization	14
Wheat supplies in four exporting countries	15

WHEAT SUPPLIES FOR EXPORT ... on May 1, of 1,650 million bushels, were about 20 percent below last year in the four principal exporting countries (United States, Canada, Argentina and Australia). Wheat supplies for export or carryover on May 1, were below last year in each of the countries except Canada. After allowing for domestic requirements for the season, U. S. supplies on May 1 totaled around 700 million as against 970 million a year earlier. Canadian supplies of about 650 million were 35 million above a year ago. With smaller crops in Argentina and Australia export supplies on May 1 were down by 110 million from a year ago in Argentina and 55 million in Australia. Exports of wheat and flour in grain equivalent from these countries July through April this year were as follows, in million bushels, with comparable figures for 1964-65 in parentheses: United States 700 (585); Canada 425 (365); Argentina 210 (130); Australia 165 (185) and total 1,500 (1,265). (Details p. 15).

PRICE SUPPORT OPERATIONS THROUGH APRIL 30 ... show that farmers put 209 million bushels of 1965-crop corn under loan or about the same as from the 1964 crop a year earlier. Through April farmers had repaid loans on 26 million -- slightly more than last year. Of the 169 million bushels of 1965-crop wheat put under price support farmers had repaid loans on 117 million. This compares with repayments of 70 million of the 195 million put under loan a year earlier. Farmers put 86 million bushels of soybeans under price support loan of which 56 million had been repaid. Of the 59 million cwt. of grain sorghum put under loan this season farmers had delivered about 42 million with 6 million cwt. repaid. (Details by States, p. 6-14).

Grains: Export prices basis prompt or 30-day shipment, May 19, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 : Yellow	No. 2 : Yellow	or Grain Sorghum 2/
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein...	1.90	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.76	1.44	3.19	1.47
Gulf	No. 1 Hard Winter: Ordinary protein 14% protein	1.89 1.94	1.41 -	3.18 -	2.13 -
Pacific Northwest	No. 2 Western White	1.55	-	-	1.30

^{1/} The export payment rate for wheat on May 19, was 45¢ per bushel for spring wheat from Duluth, 49¢ for soft red winter from Baltimore, 61¢ for hard winter from the Gulf, and 21¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

May 27, 1966

WHEAT AND SOYBEANS ADVANCE

Cash grain markets were featured by sharp advances in wheat and soybeans during the week ended May 26. Corn declined due in part to improved prospects from the favorable planting weather. Other grains were mostly unchanged.

Hard winter wheat advanced 6¢ per bushel reflecting the strong export and mill demand for the tight supplies. Dry weather caused further damage in Kansas. Harvesting of the new crop was beginning north of the Dallas-Ft. Worth area. Soft red winter went up 2-4¢ due to the good demand. Spring wheat gained 2¢ as a result of additional buying by both exporters and millers. Durum went up 3-4¢ with most interest in the better quality. White wheat bids in the Pacific Northwest were raised 3-4¢ with good export business and some concern for the new crop. Rye gained a penny with demand good and selling on a limited scale.

Corn declined 1-2¢ despite continued heavy exports and a moderate commercial demand. Good weather favored plating of the new crop in large areas. Oats held steady with a fair interest in the light receipts. The barley market showed little change except for a drop of 4¢ per bushel in the Pacific Northwest. Grain sorghum declined 2¢ per cwt. with slow demand at Kansas City but held steady in dull trading at Ft. Worth.

Soybeans advanced 6-7¢ per bushel -- the highest point since April 1961. Demand from both exporters and processors was aggressive while receipts were light. The continued heavy crushings and exports compared with a year ago was the main strengthening factor as disappearance is at record levels. Flaxseed held steady in light trading at Minneapolis.

WHEAT SUPPLIES ... on June 1 for milling, export or carryover totaled 682 million bushels -- a drop of 255 million from a year ago and 650 million bushels below the 5-year average. Exports of wheat and flour, July through May totaled a little over 780 million bushels as against 653 million the same months last year. These exports do not include bulgar, rolled wheat or other products which may total 10-15 million for the year.

SOYBEAN SUPPLIES ... on May 1 for processing, export or carryover totaled 276 million bushels compared with 244 million a year earlier. Crushings of 45 million bushels in April, brought the season's total since September 1, to 361 million as against 327 million the same months of 1964-65. Exports of soybeans, September through April totaled 186 million -- 37 million more than a year earlier. Flaxseed supplies on May 1 for processing, export or carryover totaled nearly 22 million -- an increase of 10 million over the year before. Crushings of nearly 19 million, July through May, were up slightly from the year before while exports of 3.5 million were down by 2.4 million.

Grains: Export prices basis prompt or 30-day shipment, May 26, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley

Pacific Northwest.....	No. 2 Western White.....	1.57	-	-	1.25

^{1/} The export payment rate for wheat on May 26, was 46¢ per bushel for spring wheat from Duluth, 53¢ for soft red winter from Baltimore, 65¢ for hard winter from the Gulf, and 24¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

June 3, 1966

SOYBEANS AND WHEAT ADVANCE

Soybeans and wheat advanced to season's high during the week ended June 2. Other grains showed only minor changes from a week ago.

Winter wheat advanced mostly 2-3¢ per bushel reflecting the good export demand for expanded overseas shipment. Recent Agreements with India and Pakistan provide for around 110 million bushels additional exports. Mill demand was strong for immediate needs, while crop prospects in Kansas were reported reduced by continued dry weather. Spring wheat gained 3¢ as wet fields delayed planting in the Red River Valley area. Both domestic and export demand were good for limited supplies. Durum went up 5¢ at the low end of the range due to smaller offerings and strength in other wheat. White wheat advanced about a penny in the Pacific Northwest as farmers continued tight holders. Rye went down 1¢ reflecting little interest in the very large supplies.

Corn prices were unchanged to 2¢ higher with demand adequate for the moderate marketings. Exports continued at a good rate. Wet cool weather delayed planting and growth of the new crop. Oats weakened slightly with only a moderate interest in light country offerings. Barley was barely steady during the week despite smaller receipts. Grain sorghum prices were unchanged to 1¢ lower in light to dull trading.

Soybeans advanced another 6-7¢ with the previous high in May 1961. The large inspection-for-export figure and the continued heavy domestic use were factors in the sharp advance. Soybean meal also advanced but oil was a shade weaker. Flaxseed held steady in light trading at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Average farm prices, parity and support rates	6
Soybean prices compared with soybean oil and meal prices	6
Grains - CCC dispositions	7
Food for Peace Authorizations and Agreements	8

FOOD FOR PEACE SHIPMENTS TO INDIA ... will be increased by an additional agreement signed recently. This provides that an additional 3.5 million tons of food grains will be shipped to India under the Food for Peace program to supplement the 6.5 million tons allocated since last July. The amendment to the agreement provides an additional \$313 million for the following commodities: 2.75 million metric tons (approximately 100 million bushels) of wheat or wheat flour, 750,000 metric tons (29.5 million bushels) of grain sorghum; 200,000 metric tons (7.9 million bushels) of corn; 35,000 metric tons of soybean or cottonseed oil; 700,000 bales of cotton and 2.0 million pounds of tobacco. Shipments of wheat thus far this season, July through May, totaled about 255 million bushels of wheat, 33 million bushels of grain sorghum and 4.5 million bushels of corn.

TERMINAL LOAN RATES ... were recently announced for 1966-crop wheat, barley and rye. Wheat loan rates will be the same as for the 1965 crop except for a 2¢ increase in all West Coast ports and a decrease of 2¢ at Minneapolis and related terminals. The terminal rates for 1966-crop barley will be the same as for 1965 while those for rye will be 1¢ per bushel less than a year ago.

CCC OFFERS MODIFIED UNIFORM GRAIN STORAGE AGREEMENT FOR 1966-67 ... No changes are made in the rates paid for storage and handling of grain but new sections are added to provide: An official grade determination will be required on all wheat received from farmers; prohibits oral or written agreements which limit producers' rights to redeem grain; and cash settlements will be made with country warehousemen for quality after July 1, 1966. The following provisions are eliminated: Direct transfer en route to obtain official weights and grades; requirement that CCC share the cost of quality loss resulting kernal breakage and increase in foreign material and that CCC not acquire or transfer grain in-store without consent of the warehouseman.

Grains: Export prices basis prompt or 30-day shipment, June 2, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>	Corn	Soybeans:	Barley	
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Non-transit from the East.

Grain								
Sorghum	1.79	1.79	1.97	2.53	71	2.00	2.00	2.00
Flaxseed	2.81	2.84	2.86	3.96	71	2.90	2.90	2.90
Soybeans	2.90	2.78	2.72	3.18	91	2.50	2.25	2.25

1/ Payment rates for 1966-crop are included as follows: corn 30¢, barley 20¢ per bushel, grain sorghum 53¢ per cwt.; 1965-crop corn 20¢, barley 16¢ per bushel, grain sorghum 35¢ per cwt.; 1964-crop corn 15¢, barley 12¢ per bushel, grain sorghum 23¢ per cwt.

2/ Does not include the value of certificates to eligible producers on domestic food wheat which will equal 100 percent of July 1966 parity.

3/ Does not include 75¢ (1964-crop 70¢) per bushel domestic marketing certificate and 30¢ (1964-crop 25¢) per bushel for export marketing certificate.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	May 1966 2/	Apr. 1966	Mar. 1966	May 1965
Soybean Oil:					
Average price at crushing plant.....	Cents per lb.	11.3	11.6	11.3	10.6
Value from bushel of soybeans 1/.....	Dollars	1.21	1.24	1.21	1.16
Soybean Meal 44%:					
Bulk price at Decatur.....	Dollars per ton	80.30	75.50	71.50	68.40
Value from bushel of soybeans 1/.....	Dollars	1.90	1.79	1.69	1.63
Value of oil and meal from bushel of soybeans 1/.....	Dollars	3.11	3.03	2.90	2.79
Market price of No. 1 yellow soybeans at Illinois Points.....	Dollars per bu.	3.03	2.92	2.82	2.81
Spread between soybean price and value of oil and meal.....	Cents	.08	.11	.08	-.02

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1964-65.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Volume 14 No. 23

Hyattsville, Maryland 20782

June 10, 1966

GRAIN MARKETS MIXED

Wheat and sorghum prices moved up but soybeans and barley lost ground during the week, ended June 9. Other cash grains showed little or no change.

Winter wheat finished about a penny higher, influenced by continued good mill and export demand. Harvesting moved forward at an active pace in Texas but offerings were light as farmers had a holding tendency. General rains were reported in Kansas this week. Spring wheat advanced 2¢ on the lower and middle proteins but lost 2¢ on the higher proteins. Durum held steady. Export interest in spring wheat remained active, but mill demand slowed. White wheat prices weakened in the Pacific Northwest where trading was light. Rye lost 2¢ in quiet trading.

Corn closed on a firm note with some prices up 1-2¢. Demand continued strong for light spot offerings. Oats were little changed in limited trading. Barley declined 2-3¢ behind limited demand and increased offerings. Grain sorghum advanced 3¢ per cwt. in Ft. Worth as livestock feeders provided improved demand. Planting neared completion in South Texas.

Soybeans dropped 3-4¢ per bushel, reflecting downturns in the futures market and in oil prices. Planting made good progress in the corn belt and was ahead of this time last year in some areas. Flaxseed held steady in quiet trading at Minneapolis.

U. S. Grains - inspections for export from Canadian ports, May	12

MAY GRAIN EXPORTS ... totaled 187 million bushels (4.8 million metric tons) on the basis of inspections for export. This is 15 million bushels less than the record in November 1965 and March 1966 and 5 million less than April. However, it is 35 million more than May 1965. Exports of all grains, excluding products, totaled 1,898 million bushels (49.4 million metric tons) July through May. This compares with 1,406 million bushels the same months of 1964-65 and 1,450 million in 1963-64. Wheat exports, grain only, totaled 723 million for the first 11 months of the season about 27 million more than the previous record for the same months of 1963-64. A record 615 million bushels of corn were inspected for export July through May this year -- 50 million more than the same months of 1964-65. Exports of soybeans in the 11-month period totaled 239 million bushels as against 193 million a year earlier. Exports of grain sorghum at 218 million bushels for the 11-month period were more than double those of the previous year.

1966-67 STORAGE RATES FOR RESEAL GRAIN UNDER LOAN ON FARMS ... are unchanged from those for 1965-66 and are in line with rates paid by CCC for grains stored in commercial warehouses. Following are the monthly reseal grain storage payment rates for 1966-67 for 1965-crop grains with rates for 1964-and prior crop grains in parentheses: Corn, wheat and barley \$1.095 (1.004) per 100 bushels; oats 82.1¢ (73¢) per 100 bushels; and grain sorghum \$1.960 (1.797) per 100 cwt.

INTERPRETATIONS OF THE U. S. OFFICIAL CORN STANDARDS ... will ease current restrictions on striped corn. Under the interpretations, effective June 3, yellow corn with less than 50 percent red coloring will be classified as "yellow corn," and white corn with less than 50 percent pink coloring will be classified as "white corn". Fifty percent or more coloring, of course, will place the corn into the "other color" classification. The colored stripings are considered only an appearance factor and do not affect quality or appear to be a genetic characteristic.

Grains: Export prices basis prompt or 30-day shipment, June 9, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
			-- Dollars --		
Duluth	No. 1 Heavy Northern Spring, 14% protein...	1.96	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.83	1.44	3.33	1.44
Gulf	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	1.97 2.03	1.41 -	3.28 -	2.13 -
Pacific Northwest ...	No. 2 Western White....	1.59	-	-	1.22

^{1/} The export payment rate for wheat on June 9, was 46¢ per bushel for spring wheat from Duluth, 52¢ for soft red winter from Baltimore, 60¢ for hard winter from the Gulf, and 26¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt..

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

SOYBEANS AND WHEAT ADVANCE SHARPLY

Soybeans and wheat scored sharp upturns during the week ended June 16 and prices soared to new highs for the season. Most other grains closed unchanged or a little higher.

Winter wheat prices jumped 5-11¢ per bushel. Several factors influenced the upswing. These included the forecast of a 5 percent smaller 1966 crop of 975 million bushels, weather uncertainties in the major hard wheat area where harvesting gained momentum, slow selling by farmers, good mill demand, and strong export demand. Spring wheat went up 7-8¢, supported by the winter wheat crop outlook and continued heavy use of spring wheat stocks. Durum held steady as product sales increased and users' supplies diminished. White wheat moved up 1-3¢ in the Pacific Northwest where light producer offerings met eager demand. Rye gained 3¢ on light receipts.

Corn showed little change in quiet trading. Planting neared completion and weather conditions favored the growing crop. Oats finished mostly 1-2¢ per bushel higher as modest arrivals found ready outlets. Barley generally held steady. Grain sorghum edged up a cent or two, supported by good demand for light offerings.

Soybean prices climbed steadily and sharply to close 17-20¢ per bushel higher for the week and at or near an 11-year high. Upturns reflected higher futures markets for beans and meal, strong domestic and export demand, and growing trade concern about the tighter balance between supplies and demand before the new crop comes in. Flaxseed held steady at Minneapolis where the trade took all of the limited offerings.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - estimated production by States, June 1, 1966	6
Grains - CCC-owned stocks by States, May 31	7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support, repaid, delivered and outstanding. by States	8-15
Grains - quantity under price support	16

PRICE SUPPORT OPERATIONS THROUGH MAY 31 ... show that farmers put 211 million bushels of 1965-crop corn under loan which is slightly less than for the 1964-crop a year earlier. Through May farmers had repaid loans on 38 million -- slightly more than last year. Of the 169 million bushels of 1965-crop wheat put under price support, farmers had repaid loans on 121 million while only 5 million had been delivered to CCC. Farmers put 87 million bushels of soybeans under loan of which 69 million had been repaid. Of the 59 million cwt. of grain sorghum put under loan this season, farmers had delivered 42 million to CCC with loans of 7 million repaid.

1967 WHEAT PROGRAM ANNOUNCED ... as follows: price support loan will be \$1.25 per bushel. Domestic marketing certificates on an estimated 520 million bushels will be valued at the difference between full parity as of July 1, 1967 and the \$1.25 loan value. (This year's certificate value for the 1966 crop will be about \$1.32 per bushel.) Marketing certificates to be issued represent production on 40 percent of farm allotments compared with 45 percent for the 1966 allotment. The 1967 national allotment was announced at 59.3 million acres -- an increase of 15 percent over the 51.6 million for the 1966 crop. There will not be an acreage diversion program for wheat and wheat may continue to be planted on feed grain acreage on farms participating in both programs. The "excess wheat option" contained in the 1966 program will be continued in 1967.

WHEAT PRODUCTION FOR 1966 ... was indicated at 1,235 million bushels by the Crop Reporting Board on the basis of June 1 conditions. The winter wheat crop will total 975 million which is 11 percent less than the May 1 forecast and 5 percent below last year. A spring wheat crop of 259 million was forecast -- 14 percent less than last year but 10 percent above average.

Grains: Export prices basis prompt or 30-day shipment, June 16, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
-- Dollars --					
Duluth	No. 1 Heavy Northern Spring, 14% protein...	2.03	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.93	1.44	3.47	1.41
Gulf	No. 1 Hard Winter: Ordinary protein..... 14% protein.....	2.03 2.09	1.41 -	3.46 -	2.08 -
Pacific Northwest	No. 2 Western White.....	1.60	-	-	1.22

^{1/} The export payment rate for wheat on June 16, was 53¢ per bushel for spring wheat from Duluth, 58¢ for soft red winter from Baltimore, 65¢ for hard winter from the Gulf, and 30¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.

Volume 14 No. 25 Hyattsville, Maryland 20782 June 24, 1966

GRAIN PRICES SHARPLY HIGHER

Cash grain prices advanced sharply during the week ended June 23 with wheat and soybeans at new highs for the season. Most other grains followed the lead of wheat and soybeans but at a more moderate pace.

Cash winter wheat jumped 8-12¢ per bushel reflecting active domestic demand, increased export interest and unusually heavy futures trading. Additional strength came from the sale by Canada of 330 million bushels of wheat to Russia over a three-year period and the sale by Australia of 22 million bushels of wheat to China. Although around 10 percent of the crop has been harvested in Kansas, sales by farmers have been light and receipts are mainly for storage. Spring wheat went up 8-9¢ with good domestic demand and heavy movement. Durum advanced 14¢ with improved export interest and large sales. White wheat advanced to new season's high in the Pacific Northwest with gains of 10¢ per bushel. Rye gained 8¢ in active futures trading with the cash following the futures.

Corn went up 5¢ per bushel on an average reflecting heavy export buying and near-record futures trading. Offerings were light with movement mainly on previous contracts. The new crop generally made good progress. Oats were generally steady with demand and offerings about in balance. Barley was little changed at Minneapolis but gained 1-2¢ on the West Coast. Grain sorghum went up 5-6¢ per cwt. with demand good for light offerings.

Soybeans climbed another 14-20¢ per bushel reflecting aggressive cash demand and extremely active futures trading. The record crush of 50.5 million bushels during May and authorizations to India to buy vegetable oils were also strengthening factors. Crop development was somewhat behind average. Flaxseed held steady in quiet trading at Minneapolis.

WHEAT AND FLOUR EXPORTS ... totaled 781 million bushels July 1965 through May 1966 on the basis of Census reports. This does not include the equivalent of 8.3 million bushels of rolled wheat and bulgar exported in the same period. June exports of wheat and flour on the basis of incomplete inspections may total around 67 million. If realized, exports of wheat and flour for the season would total around 856 million - or about the same as the record quantity exported in 1963-64. Exports of feed grains for the fiscal year, ending June 30, total 25.5 million metric tons or nearly 8 million more than in the same period of 1964-65. These exports do not include around one-half million metric tons of feed grain products.

SOYBEAN SUPPLIES ON JUNE 1 ... for processing, export, or carryover totaled 205 million bushels or around 20 million more than on June 1, 1965. May crushings of 50.5 million bushels was a record high and brought the season, beginning September 1, to 411 million. This compares with 368 million crushed in the same period last year. Exports in the 9-month period totaled 208 million as against 167 million a year earlier.

FLAXSEED SUPPLIES ON JUNE 1 ... for processing, export or carryover totaled 17.7 million bushels or around 5 million more than a year earlier. Crushings of flaxseed in the first 11 months of the season totaled 20.5 million bushels compared with 19.2 million for the same months of 1964-65. Exports of about 5 million the first 11 months were around 1 million less than the year before.

Grains: Export prices basis prompt or 30-day shipment, June 23, 1966
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

1/ The export payment rate for wheat on June 23, was 56¢ per bushel for spring wheat from Duluth, 63¢ for soft red winter from Baltimore, 73¢ for hard winter from the Gulf, and 37¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 30¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Non-transit from the East.
